Roll no.: 086

Lab 4: Event Handling in Windows Forms Application

OBJECTIVES:

i. Create a Windows Forms Application for checkout with at least five product selections for the user, along with the quantity of each product.
ii. On clicking the "Checkout" button, the quantity and product price calculation should take place and display the complete order to the user along with a grand total.
iii. The "Cancel" button should reset all the products.

LAB 04

Question:

i. Create a Windows Forms Application for checkout with at least five product selections for the user, along with the quantity of each product.

ii. On clicking the "Checkout" button, the quantity and product price calculation should take place and display the complete order to the user along with a grand total.

iii. The "Cancel" button should reset all the products.

Program:

```
namespace CheckoutApp;
public partial class Form1 : Form
{
   // Product prices
   private decimal[] prices = { 1.99m, 0.59m, 2.49m, 3.29m, 2.99m };
   private string[] productNames = { "Apple", "Banana", "Bread", "Milk", "Eggs" };

   public Form1()
   {
      InitializeComponent();
   }

   private void checkoutBtn_Click(object sender, EventArgs e)
   {
      orderList.Items.Clear();
      decimal grandTotal = 0m;

      NumericUpDown[] qtys = { product1Qty, product2Qty, product3Qty, product4Qty, product5Qty };

      for (int i = 0; i < 5; i++)
```

```
        {
            int qty = (int)qtys[i].Value;
            if (qty > 0)
            {
                decimal lineTotal = qty * prices[i];
                grandTotal += lineTotal;
                string item = $"{productNames[i]}: {qty} @ ${prices[i]:F2} = ${lineTotal:F2}";
                orderList.Items.Add(item);
            }
        }

        totalLabel.Text = $"Grand Total: ${grandTotal:F2}";
    }

    private void cancelBtn_Click(object sender, EventArgs e)
    {
        product1Qty.Value = 0;
        product2Qty.Value = 0;
        product3Qty.Value = 0;
        product4Qty.Value = 0;
        product5Qty.Value = 0;
        orderList.Items.Clear();
        totalLabel.Text = "Grand Total: $0.00";
    }
}
```

Output:

THE END
